**UNIVERSITY OF ESWATINI
(formerly University of Swaziland):
BACKGROUND INFORMATION**

Historical Note

The University of Eswatini (formerly University of Swaziland) developed from the University of Botswana, Lesotho and Swaziland (UBLS), formerly known as the University of Basutoland, Bechuanaland and Swaziland (UBBS), which had its headquarters in Lesotho between 1964 and 1975. The UBBS had developed from the Pius XII Catholic University College at Roma - itself the product of a long-held desire for an institution of higher learning for Africans, of the Catholic hierarchy in Southern Africa.

From its foundation, Pius XII was a college of the more liberal University of South Africa (UNISA), to prepare students for the Bachelor of Arts degree. Following a special agreement reached with UNISA in 1954, under which courses were taught and examined, Pius XII was allowed to expand its academic horizons to include courses leading to UNISA's degrees of Bachelor of Commerce, Bachelor of Science, and a post-graduate Diploma in Education. By 1963 there were 180 students, both men and women, and substantial buildings including a science block, refectory, administrative building and workshops.

However, even by the late 1950s the College had begun to experience hardships that threatened its future - principally shortage of income, and deteriorating ties with UNISA, including restrictions on the College's policy for the admission of students. By June 1963 negotiations were completed between the High Commission Territories and the Roman Catholic

authorities responsible for the College and the new University was established.

The UBLS conferred its first degrees in April 1967, after a transitional period during which former Pius XII College students continued to take University of South Africa degrees. UBLS offered its own four year undergraduate degrees and diplomas in Arts, Science and Education; Law courses took five years, two of them spent at the University of Edinburgh. Students seeking specialized degrees such as medicine, engineering, etc, proceeded to other universities after completing Part I studies in Science. From a total of 188 students in 1964 the University grew to 402 students in 1970, of whom 145 were from Lesotho and lesser numbers from Swaziland, Botswana, Rhodesia, South Africa and elsewhere. Meanwhile the number of academic staff grew from 31 in 1964 to 78 in 1970.

Although UBLS was equally funded by the three Governments it had comparatively little presence in Botswana or Swaziland in the first phase of its existence during 1964-70. The only exception being the Faculty of Agriculture (constituted in 1972) at Luyengo in Swaziland. This Faculty had developed from the Swaziland Agricultural College and University Centre (SACUC), opened in 1966. Meanwhile in Botswana the UBLS presence was limited to the activities of the Division of Extra-Mural Services and a small short-course centre which was built during 1969.

Post-Independence Development

With independence, the three countries began to take a closer look at the colonial inheritance of education and to identify the role of UBLS in the training of higher and middle-level personnel. A series of academic planning reports for UBLS were produced after 1966, culminating in the second Alexander Report of 1970. The report recommended the establishment of university campuses in each country and a unified development of higher education and vocational and technical training. The suggested plan was for Part I studies to begin in Botswana and Swaziland, with eventual division of Part II studies among the campuses, and also the consideration of 'polytechnic' arrangements for technical and vocational courses.

This report was accepted by the University and by the Governments of Botswana, Lesotho and Swaziland in October 1970, heralding the second phase (1971-1976) of UBLS development. Plans were immediately drawn up to spend about one million Rand on campus development in each of the three countries. There were to be new campuses - within the capital city of Gaborone in Botswana and at Kwaluseni in Swaziland. Funds were obtained from the American, British, Canadian, Danish and Netherlands Governments as

well as from the Governments of the three countries, the Anglo-American Corporation and other bodies. Plans for specialized Part II and professional studies on each campus were dramatically advanced by the devolution of Part II Humanities teaching to Gaborone and Kwaluseni, in addition to Roma, in 1974.

Following student unrest at Roma, and strained relations between the central UBLS administration and the Lesotho Government, over implementation of agreed development plans, the Roma campus was precipitately withdrawn from UBLS and constituted as the National University of Lesotho (NUL), on Monday October 20th, 1975. This occurred at a time when a working group on further devolution of UBLS into three University Colleges was preparing its report for the Council of the University (The Hunter Report). The nationalisation of all facilities, monies and files in Lesotho meant that the central administration of UBLS could operate with only limited effectiveness from temporary premises at Malkerns during 1975-76; students from Botswana and Swaziland were immediately withdrawn from the Roma campus on the appropriation of all UBLS property in Lesotho by NUL. Part II teaching of these students was resumed within a few months in Botswana (Economics and Social Studies and Science) and in Swaziland (Law).

In 1976, following the acceptance of the Hunter Report in principle and further negotiations between the University and the Governments of Botswana and Swaziland, the University of Botswana and Swaziland, with two constituent University Colleges, was set up. The new university was dedicated to maintaining and intensifying service to the ideals previously laid out for UBLS by the Botswana and Swaziland Governments. The ideals are summed up in the Second National Development Plan of Swaziland, as playing an increasingly important role in national development not only through the educated manpower needed, but also through (the university's) great potential as a focus for the academic and cultural activities of the nation.

The two countries, however, realized that in the long term the two university colleges would develop into independent national universities. A development plan for 1975-85 was agreed, with student numbers rising so as to justify two independent institutions after the 1981/82 academic year; this agreement was effected, as scheduled, in June 1982.

Recent Developments

Since achieving university status, UNESWA has continued to grow and develop in accordance with its stated aim of assisting national development. The University consists of three campuses namely: Kwaluseni Campus (Main), Luyengo Campus (Faculty

of Agriculture) and Mbabane Campus (Faculty of Health Sciences). Student enrolment has risen steadily, paralleled by an ever-increasing output of graduates since the University's first Congregation for the Conferment of Degrees in 1982, as shown in the table on page 26.

The chief mandate which UNESWA has tried to implement has been manpower production. This is clearly indicated in the type of programmes that were selected at the beginning and which even now constitute a major part of UNESWA programmes:

The Faculty of Agriculture began by offering certificates and diplomas in General Agriculture, Agricultural Education and Home Economics to produce, mainly, officers for the Ministry of Agriculture and Cooperatives and the Ministry of Education. Later degree programmes in General Agriculture, Agricultural Education and Home Economics were introduced with the same output in mind. The certificate programmes were offered on demand by the Government. In 1990, a restructured five-year programme (three year diploma/ two year degree) was introduced after realizing that the public sector, which was the target market for its graduates was getting saturated. In 2005/2006 academic year, departments in the then Faculty of Agriculture examined their pertinent diploma/degree programmes, and identified a number of unnecessary overlaps in courses. The revision of such courses to remove overlaps resulted in reduction of the duration of programmes from five years to four years. Thus four year degree programmes were introduced at the then Faculty of Agriculture in 2006/2007 academic year. The programmes were further fine-tuned in 2009/2010 academic year to make improvements in each of the existing degree programmes.

The Faculty of Commerce was established in 1990. It offers a four year degree programme in two departments: the Department of Accounting and Finance, and Department of Business Administration. Within the Business Administration there are two areas of specialization: Marketing and Management. Students enrolled in management pursue numerous career options: Human Resource Management, Operations Management, Information Systems, Entrepreneurship, and Supply Chain Management. The Faculty has just fully semesterised its courses. In the process, more developmental initiatives have been integrated like infusing Public Procurement in operations management and project management curricula.

In 2008, the Faculty established an Entrepreneurship and Business Development Centre in an endeavour to promote entrepreneurship development in Swaziland. Its focus is on the pressing need to fast track national development through entrepreneurship. Thus it now offers entrepreneurship courses across all Faculties and

conduct outreach programmes to SMMEs in liaison with other Service Providers.

Stakeholders have a major role in the review of the curricula, aid in placement of students' interns and make inputs to the Faculty strategic plans. Thus the Faculty regularly works with the Industry Advisory Council but meetings are precipitated by the needs. The strengthened relationship with government and industry, including civic society has contributed immensely to improved students' practical experience and to staff development in terms of best contemporary practices that they infuse in their course offerings.

Practitioners are also actively involved in teaching some of the courses to enhance students' practical experience in all areas like Accounting, Auditing, Finance, Marketing, HRM and Entrepreneurship. The Faculty's development is not only confined to education and business but is responsive to societal and health challenges.

Commerce students through Enactus, embark on community development projects like: Agricultural projects, Rural community development projects, recycling projects, fruit drying and packaging, and many other related ones, such as fund-raising initiatives for them and embark on projects targeted to aid the orphaned and vulnerable children.

Other developments involve annual Commerce Discussion forum with our industry captains exhibiting their products and sharing information on the type of products they require from the University. The forum attracts over thirty business captains. It is a major information exchange forum whereby the Faculty also shares what they offer and students get a chance to exhibit their potential.

The Faculty of Consumer Sciences was established in July 2016. It was formerly the Department of Consumer Science in the Faculty of Agriculture and Consumer Sciences. The Faculty has three departments namely: Consumer Science Education and Community Development; Food and Nutrition Sciences; and Textiles and Apparel Design. Undergraduate Bachelor of Science programmes offered are in: Consumer Science; Consumer Science Education; Food Science Nutrition and Technology; and Textiles, Apparel Design and Management.

The Faculty of Education has five departments namely: Adult Education, Curriculum and Teaching, Educational Foundations and Management, In-Service Education and Primary Education. Through the Department of Adult Education, the Faculty offers professional training in adult and continuing education, and helps increase the effectiveness of institutions,

organisations and community-based groups which serve the adult population of Eswatini and beyond. Aspiring students are able to learn while keeping their jobs and performing other obligations as tuition offered is part-time. The other three departments offer pre-service and in-service training of teachers and have continued to meet the needs for educators and school administrators at all levels.

The Faculty of Health Sciences was created in 1996, having previously been the Institute of Health Sciences. The Faculty offers certificate, diploma and degree programmes in General Nursing, Community Health Nursing, Community Mental Health Nursing, Midwifery and Environmental Health Science. The Faculty has since established a Continuing Education programme that is co-ordinated by Consultancy and Training Centre (CTC) in response to the dynamic health care needs of the country.

The Faculty of Humanities offers three programmes of study, namely (1) Bachelor of Arts in Journalism and Mass Communication, (2) Bachelor of Arts in Humanities, and (3) Master of Arts. The Degree in Journalism and Mass Communication has been designed to meet the specific human resource needs of the media industry, and to foster and enhance research in media studies. The Bachelor of Arts in Humanities was primarily intended to provide sound foundation for those who wish to join the teaching profession. The Master of Arts programme is at present offered only by the Department of History in collaboration with the Institute of Post-Graduate Studies at UNESWA.

The Faculty of Science & Engineering has evolved considerably over the past decade and now has the following departments; Biological Sciences, Chemistry, Computer Science, Electrical and Electronic Engineering, Geography, Environmental Science & Planning (GEP), Mathematics, and Physics. With the exception of Electrical and Electronic Engineering, all departments teach courses that lead to the four-year degree of Bachelor of Science. The five-year B.Eng. programme reflects the Faculty's intention to widen the Science and Technology base in the country. The B.Sc. degree programme is mainly for the production of teachers, with a small proportion going to study Medicine, Pharmacy, Engineering, Aviation, Geology, Environmental Management and other courses not yet offered at UNESWA.

The Faculty of Social Sciences (FOSS), has five teaching departments namely, Economics, Law, Political and Administrative Studies, Sociology and Social Work, and Statistics and Demography. In line with global technological developments, the Faculty of Social Sciences has seen it fit to make computer

literacy an integral part of its curricula. The Faculty produces highly qualified computer literate graduates ready to pursue a career in the private or public sector. In response to the needs of the people of Eswatini, the Faculty has embarked on a new development phase guided by the UNESWA strategic planning philosophy. Departments in the Faculty have restructured and strengthened their programmes and they see this process as on-going in line with new challenges and demands. The Department of Sociology has introduced a Bachelor's degree in Social Work.

The Institute of Post-Graduate Studies. The objectives of the Institute of Post-Graduate Studies as stated in the University Development Plan included the following: to co-ordinate, plan and implement Post-Graduate Studies programmes throughout the University; to establish Post-Graduate Studies programmes at an international standard, in areas relevant to the cultural, intellectual and economic development of the Kingdom; to meet the personal and professional development needs of the graduate output of the University of Eswatini strengthened programmes at the Bachelor level; to provide professional manpower in areas relevant to National development goals and to provide training in research. The Institute continues to fulfill these objectives. Currently the Institute offers 23 Master's degree programmes and two Ph.D. degree programme on both full and part-time basis.

Centre of Excellence in Learning and Teaching (CELT) formerly the Academic Development Centre (established in 2001) was renamed in 2019. The Centre was remanded to provide and assure compliance to teaching and learning Quality Assurance Policies. The Centre is also responsible for introducing technology-enabled learning in all UNESWA's programmes. The Centre provides training and support to teaching staff in the design and delivery of outcome-based curricula; blended learning; effective assessment; and classroom management.

University Planning Centre was established in 2001 immediately after the completion and adoption of the University's first Strategic Plan. At inception, the primary focus of the Centre was to aid the University play a pro-active role in strategic planning, management, monitoring and evaluation. The Centre continues to provide support to Faculties, Centres and Units in the formulation and implementation of their work plans based on their strategic objectives. The UPC has evolved overtime from only being the custodian of the University's Strategic Plan to playing an active role in the establishment of the institution's external links with other regional and international institutions. It is tasked with the provision of technical advice on the feasibility and viability of these links. The Centre also serves as a nucleus for all planning activities within the

University with having the responsibility of ensuring the timely submission of annual and quarterly statutory reports to Government as well as other regional and international organisations that may need information on UNESWA. The UPC is also mandated to be an interface between the University and the UNESWA Foundation by coordinating the needs of the University and then assisting with proposal writing, donor scouting and any other assistance that may be required by the Foundation from time to time.

Eswatini Institute for Research in Traditional Medicine, Medicinal and Indigenous Food Plants.

Eswatini is endowed with a very rich diversified flora. She is one of the African countries where the overall plant diversity is at the highest level. Species include plants used by traditional medicinal practitioners (TMPs), plants with proven activity against pests and those with potential as pharmaceuticals and fragrances, as well as edible wild plants. However, many of the edible wild plants and species used in traditional medicine are threatened with extinction because of unsustainable harvesting and great pressure on land for growing cash crops. There is also no adequate documentation of the indigenous knowledge on plant use in the country. The Eswatini Institute for Research in Traditional Medicine, Medicinal and Indigenous Food Plants was established to address these issues. The Institute provides a forum for the meeting of TMPs, orthodox medical practitioners, natural and social scientists, lawyers, agriculturists, nutritionists and policy makers to tackle multifaceted research agenda inherent in nutrition and traditional medicine.

UNESWA Research Centre. The UNESWA Research Centre serves as the focal point for research at the University. It was established in 1995. The objectives of the Centre are to facilitate, prioritise, formulate, coordinate, strengthen, promote and generate research agenda; and disseminate knowledge and information through research to enhance economic growth and development in Eswatini and beyond. The UNESWA Research Centre is governed by the UNESWA Research Board, which is responsible to Senate. Membership of the Board include all Deans of Faculties and members of a technical advisory committee. The functions of the Centre include sourcing funding for research, monitoring projects funded by the UNESWA Research Board, commissioning studies, editing publications of the Centre, organisation of seminars and workshops; and the coordination of collaborative links with national and international organisations.

Centre for Community Services. The Centre for Community Services (CCS) has been initiated by the University's Strategic Plan, which identified excellence in the provision of community service as one of the mandates of the University. The University has a pool of 'knowledge, expertise and resources' that should be transformed into services for the development of people in their communities. Some key functions of the Centre are: to formulate and implement community service guidelines and policy; document and disseminate information arising from teaching and research for the benefit of the University's community service clientele; collaborate with relevant organs of the University to integrate teaching, research and community service. The Centre works with key stakeholders: UNESWA staff and students; communities and the service providers - both public and private.

Consultancy and Training Centre (CTC) was established by the University Council on 1 June 2000. The main objective of CTC is to design and/or carry out the following activities: contract research; client-driven consultancy and training; professional short courses; training needs assessment for clients; formulation of human development plans; client-driven workshops and seminars; feasibility studies; training materials development and publishing; customer tailored courses for entrepreneurship and self employment; economic and social surveys, and information and communication technology development.

Information and Communications Technology (ICT) Centre The ICT Centre was established in 2001 as a result of the merger of the Information Systems Development Unit (ISDU) and the Computer Centre departments. The University of Eswatini strategic plan 2000-2005 identified Information and Communications Technologies as one of the strategic objectives to improve teaching, learning, research and administration at the University, hence the need to have a single department being responsible for ICTs at the University resulting in the establishment of the ICT Centre. The Computer Centre was established to provide computing facilities for the Computer Foundation Course offered to all first year students. In addition to this, the Centre was responsible for: provision of central computing facilities for use by students and staff of the University, manage and maintain the university computer network infrastructure; maintain the university's internet connection and associated activities and provide the help desk function for the University.

Institute of Distance Education (IDE). IDE came into existence as a result of the national educational demands. In view of inherent constraints in admissions to the full-time courses on campus, the University of Eswatini (UNESWA) established the Institute of Distance Education (IDE) in 1994. The aim of the IDE is to offer higher education programmes, through the distance education mode, for the benefit of all those who had been deprived of the opportunity, for one reason or the other, to enter the mainstream education, and thus its motto is: *“Taking the University education and professional programmes to the people rather than the people coming to the University.”* The Institute of Distance Education follows the multimedia system and provides printed course materials to the learners and arranges limited face-to-face sessions through lecturing and tutorial sessions.

Entrepreneurship Business Development Centre (EBDC) was established in 2008 with the view to promoting the University mission of Enterprise Development. To achieve the mission, it inculcates the culture of entrepreneurship among youth and develops business skills of existing Small Medium Enterprises (SMEs) through training, coaching and counselling, enterprise development, discussion forums on best practices, research, information dissemination and keeping a database on SMMEs activities. It is thus a knowledge hub for SMMEs and offers outreach programmes to various communities countrywide. Its major intention is to facilitate provision of coordinated support services to SMEs.

2.30 **STUDENT FINANCIAL PROCEDURES**

2.31 Reporting to the Bursar's office for financial clearance is the first step for a candidate who wants to register; until financial clearance has been obtained from the Bursar, registration will not begin.

2.32 The fees for any semester must be paid at registration per semester in the following manner:

- (a) A student who is sponsored by Government and/or one or more reputable local and international organisation(s) must provide written proof of sponsorship before he/she is allowed to proceed with the registration process. These sponsors will be required to pay the fees in full in the first semester.
- (b) A self-sponsored student shall normally pay the tuition fees in full at registration. A student who is unable to pay full fees may be allowed to pay tuition fees in tranches in the following manner:
 - (i) An initial payment of 40% of the tuition fees for the first semester plus administration fees shall be paid at registration at the beginning of the first semester.
 - (ii) The balance of the first semester fees shall be paid by the end of November of that semester.
 - (iii) The first instalment of the second semester fees, which shall be equivalent to 40% of the total tuition fees for that semester shall be payable at registration in January.
 - (iv) The balance of the second semester fees shall be paid by the end of March of that semester.
- (c) Repeating student shall pay the full amount for courses per semester.
- (d) Bank guaranteed cheques should be crossed and made payable to the University of Eswatini. Only cash payments may be made directly to the University's bank account indicated by the Bursar to students and sponsors.
- (e) Scholarships administered by the University shall be awarded on the understanding that any moneys received by the University and distributed to or on behalf of the student, will not be repayable should the student withdraw during the course of the academic year without permission of the University.

- (f) Tuition fees for the first semester are not refundable after the registration period. Second semester fees shall only be refundable to the sponsor if the student formally withdraws from the University before the first day of the semester.

2.33 During mid-semester and Easter break vacations, a student may apply to remain in residence. A student will not be allowed to remain in residence during long vacations.

2.34 A student who damages University property or equipment will be charged with the cost of repair or replacement, and must settle such accounts by cash payment on demand. The caution fee is held to cover charges or losses levied at the end of the academic year, the balance being refundable to the student upon presentation of clearance forms signed by authorised officers.

2.35 A student who owes the University other amounts such as discipline fines, fines for lost library books, fines for destroyed University properties, etc., shall not be cleared by the Head Warden (Kwaluseni), Senior Warden (Luyengo) and Warden (Mbabane) until the amounts owed to the University are paid.

- (a) A student who owes the University, for charges or losses levied at the end of the academic year, should have the amount subtracted from the Caution Deposit and the student gets the remainder.

- (b) In the case of a student who owes more than the Caution Deposit, the University shall withhold the Caution Deposit and demand payment of the balance during the long vacation. If the student does not pay this, he/she will not be given his/her examination results, will not be allowed to register in the next Semester and will not be given transcripts until he/she has settled his/her account.

- (c) The Head Warden shall submit the list of students who owe the University one week before the Senate meeting on results. The results of owing students will be kept by the Registrar who will only release them when the concerned students present a receipt, duly endorsed by the Bursar's office, indicating that the student has settled the amount owed.

2.36 Once the student has been deregistered, he/she will not be allowed to re-register for that year even if he/she comes back with the amount owed.

3.10 RESIDENCE AND DISCIPLINE REGULATIONS

3.11 Unless special permission has been given by, or on behalf of, the Vice Chancellor, and facilities permitting, full-time students

- are required to live in an approved Hall of Residence on the campus.
- 3.12 (a) A student is required to abide by the Arrangement and Regulations for Student Discipline as made from time to time by the Senate. It is the responsibility of a student to acquaint him/herself with these regulations, both as regards Halls of Residence and general conduct. A student is expected to abstain from conduct likely to bring discredit to the University, whether he/she is on the University premises or not.
- (b) Breaches of rules and regulations in respect of discipline and good conduct will render a student liable to the penalties approved by the University Council and Senate for such offences.
- (c) Whilst it is not expected that a student will want to withdraw from Residence there could be personal or health reasons that might require a student to leave the Residence. If a student wishes to leave, written notice must be given to the Wardens/Head Warden two weeks in advance. The student will be refunded for the number of days that he/she did not live in residence. The refund will be calculated on the unused number of days, after the notice period has elapsed.
- 4.10 ADMISSIONS, FEES AND DISCIPLINE REGULATIONS**
- 4.11 The detailed requirements and procedures for admissions are listed under Admissions Regulations, Academic General Regulations and Faculty Special Regulations.
- 4.12 Prospective applicants may obtain application forms from the Admissions Secretary on the Kwaluseni Campus.
- 4.13 Application for a Government or other Scholarship tenable at UNESWA does not take the place of application to the University for admission. Application for a grant and for admission to the University can go forward concurrently.
- 4.14 No application can be considered if all the forms and other requirements outlined in the Admission Regulations have been received by the due date.
- 4.20 SCHOLARSHIPS AND FEES**
- 4.21 Details of University Fees and deposits are listed in the Financial Regulations section of the Calendar.
- 4.22 Many Governments, some industrial trusts and various corporations are prepared to offer grants or scholarships to prospective students. Information about these should be obtained from the appropriate authority concerned.

- 4.23 In the case of citizens of Eswatini, applications for study loans should be made to the Principal Secretary, Ministry of Labour & Social Security.
- 4.24 Although every effort will be made to ensure that deserving students are not deprived of opportunities to study by lack of financial means, admission to the University does not imply that a scholarship is available.
- 4.25 The University does not make loans of any nature to students.
- 5.10 TRAVEL**
- 5.11 The cost of travel to and from the University is entirely the students' responsibility. Educational concessions can usually be obtained provided application is made in good time. Concession forms must be signed and stamped by the Registrar and this is only done for those who have been granted admission.
- 5.12 A student from a country other than Botswana and Lesotho may require a visa in order to pass through the Republic of South Africa. An application for a visa should be made to the appropriate South African Embassy in good time. A student wishing to enter Eswatini via Mozambique must also obtain a transit visa from the Mozambican authorities.
- 5.13 A non-Swazi student, unless otherwise advised, must obtain a residence permit under the appropriate Eswatini Immigration Law.
- 6.10 CAMPUS FACILITIES**
- 6.11 Kwaluseni Campus**
- The first stage of campus development was financed jointly by grants from the United Kingdom, Canada, the U.S.A. Anglo-American Corporation and the Government of Eswatini. It was officially opened by His Majesty King, Sobhuza II on 8 September 1973. All buildings have been placed in a landscape setting and are of a modern design. Sporting and leisure facilities for staff and students exist and plans for expansion are underway. Student hostel provision is at present 1119 beds. Kwaluseni is located 9 km from Manzini and 30 km from Mbabane.
- 6.12 Luyengo Campus**
- Formerly the Swaziland Agricultural College and University Centre (SACUC), the Luyengo Campus now constitutes the University's Faculty of Agriculture and Faculty of Consumer Sciences. It is located in the Malkerns Valley approximately 30 km from Mbabane and 27 km from Manzini along the main Manzini-Bhunya road. There is hostel accommodation for 410 students and housing for academic staff.

6.13 Mbabane Campus

Formerly the Swaziland Institute of Health Sciences, the Mbabane Campus is located in Mbabane about 30 km away from the Kwaluseni Campus. The Faculty which has a total ground area of about 15 000 m² comprises three blocks of students' hostels, a dining hall, library, lecture rooms and the main administration building.

6.14 Extra-Curricular Activities

The development of student societies and organizations is actively encouraged. The Senate recognises the Students Representative Council with the primary functions of representing student opinion on campus, providing an official channel of communication between students and University Officers, and encouraging social and sporting activities. On both campuses there are limited facilities for sports and efforts are being made to improve and extend them. Personal sports equipment must be provided by the students themselves. There are sports clubs of different kinds on all Campuses.

6.15 Religious Services

Regular services are held and local ministers or ordained staff members of the University, representing the different denominations, are invited to lead these services. There is a chapel for use by the different denominations at the Kwaluseni Campus. The Student Christian Movement, an inter-denominational organisation, has branches on all campuses.

6.16 Halls of Residence

The halls of residence are well equipped and the University supplies each student with three sheets, two pillow cases and a pillow. Students should bring their own blankets. Luyengo houses those students involved in the various courses of study of the Faculties of Agriculture and Consumer Sciences. Kwaluseni, the Main Campus, takes students enrolled in the Faculties of Commerce, Humanities, Social Sciences, Education, and Science & Engineering. Mbabane, the third Campus of the University, houses students enrolled in the Faculty of Health Sciences. While it is normal policy to accommodate students on the

campus on which they are taught, the pressure on existing facilities is such that students may have to reside on one campus and be taught on the other. All full-time students are eligible for places on campus, if available; no student may take up residence without written notice that a place is available. Student accommodation is, however, limited and students may have to seek accommodation off campus. The University has, at present, no accommodation for married students.

6.17 Health Services

The three campuses have Clinics run by qualified nurses, with the services of a visiting doctor. Students and staff may also obtain medical attention at the Luyengo Government Clinic, the Government Hospital Mbabane, or the Raleigh Fitkin Memorial Hospital, Manzini.

7.10 BOOKSHOP - The University bookshop is operated by a privately owned company on the Kwaluseni, Luyengo and Mbabane Campuses. Stationery is also available on a cash basis on all campuses.

7.11 Sale of Textbooks:

- (a) Textbooks may be purchased with cash.
- (b) Textbooks are sold against book allowance accounts only when students produce a valid ID card. If an ID card is lost a replacement card is obtainable from the Academic Office.
- (c) No book allowance balance can be refunded. Balances for returning students will be carried over to the following year.
- (d) Books should be purchased carefully as textbooks cannot be returned.
- (e) During the first few days of each semester a sales schedule for text-books will be posted.
- (f) Hours of bookshop operation will be posted.
